1. Introduction

This project focuses on developing a user-friendly Login and Signup interface using React.js. The main objective of this task is to design and implement responsive frontend pages for user authentication.

The application includes separate pages for user registration (Signup) and user login, with proper navigation between them. This task helps in understanding component-based architecture and routing in React.

2. Technologies Used

Frontend:

- React.js
- HTML
- CSS
- JavaScript
- React Router DOM

Tools:

- VS Code

3. Project Structure

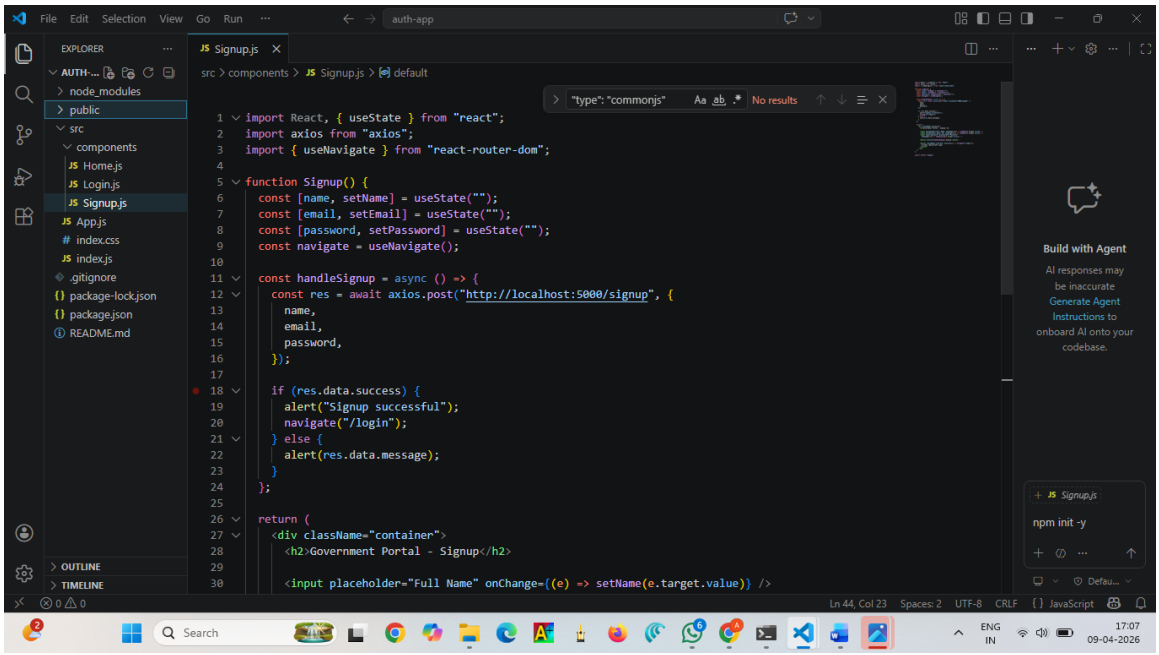
```
auth-app (Frontend)
  ├── src
  │   ├── components
  │   │   ├── Signup.js
  │   │   ├── Login.js
  │   │   └── Home.js
  │   ├── App.js
```

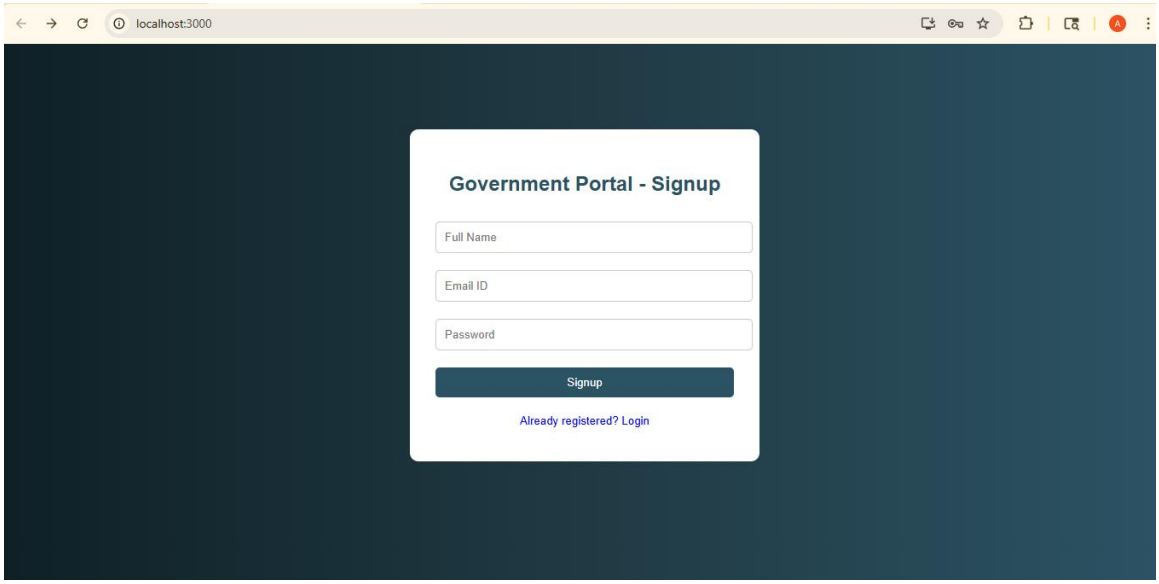
```
│   └── index.js
```

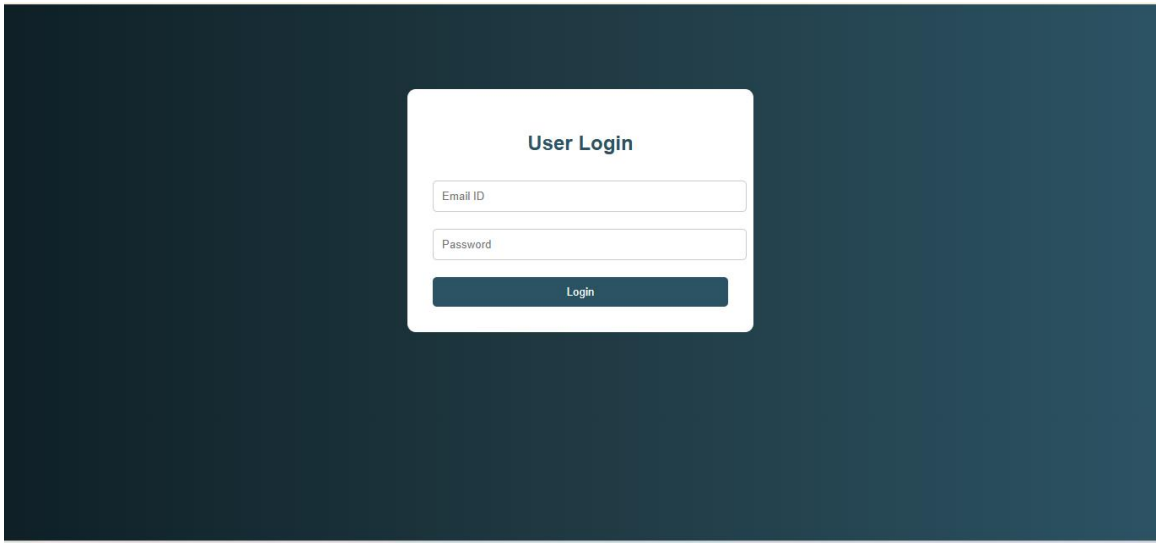
4. Step-by-Step Process

1. Created a React application using create-react-app.
2. Developed functional components for:
    - Signup page
    - Login page
    - Home page
3. Implemented routing using React Router DOM:
    - Default route ("/") → Signup page
    - "/login" → Login page
    - "/home" → Home page
4. Designed forms using HTML input fields:
    - Name, Email, Password for Signup
    - Email and Password for Login
5. Used React hooks (useState) to manage form data.
6. Added navigation buttons:
    - Signup page → Login page
    - Login success → Home page
7. Styled the application using CSS for a clean and professional look.

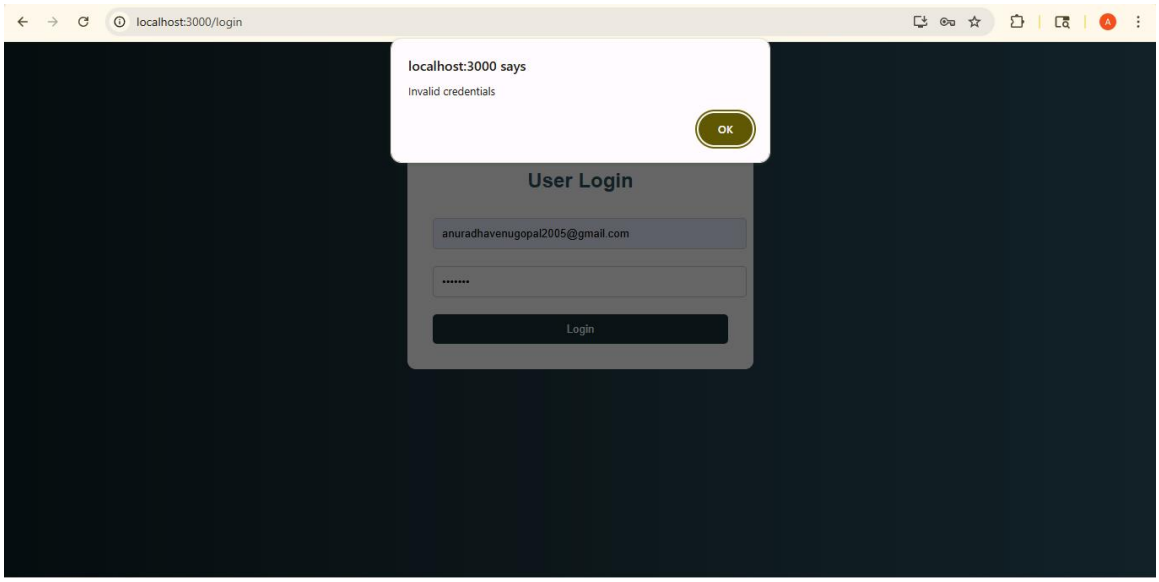
5. Project output



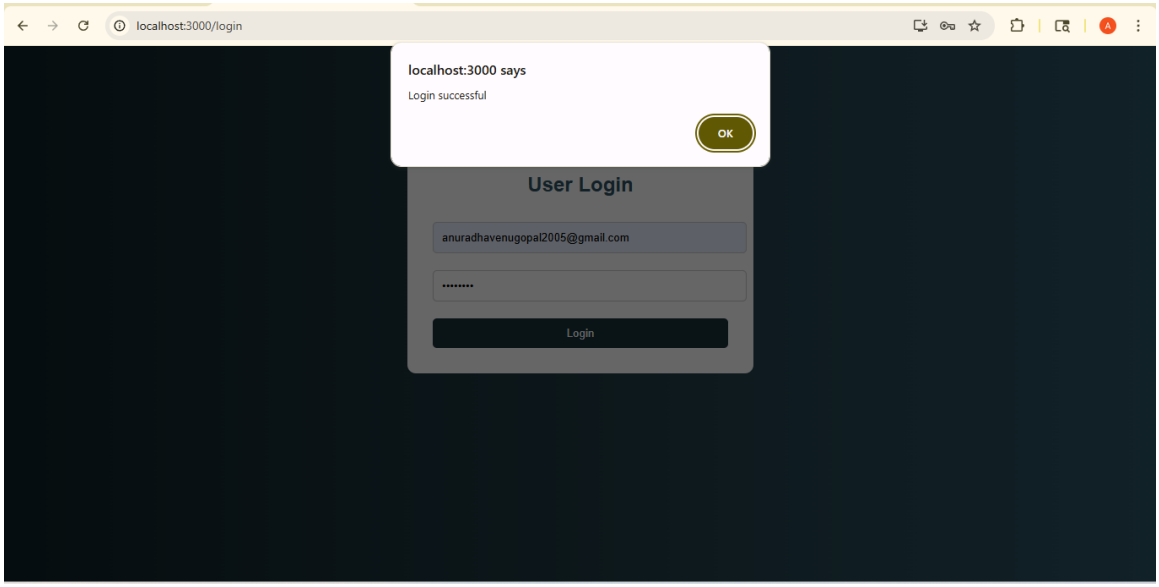




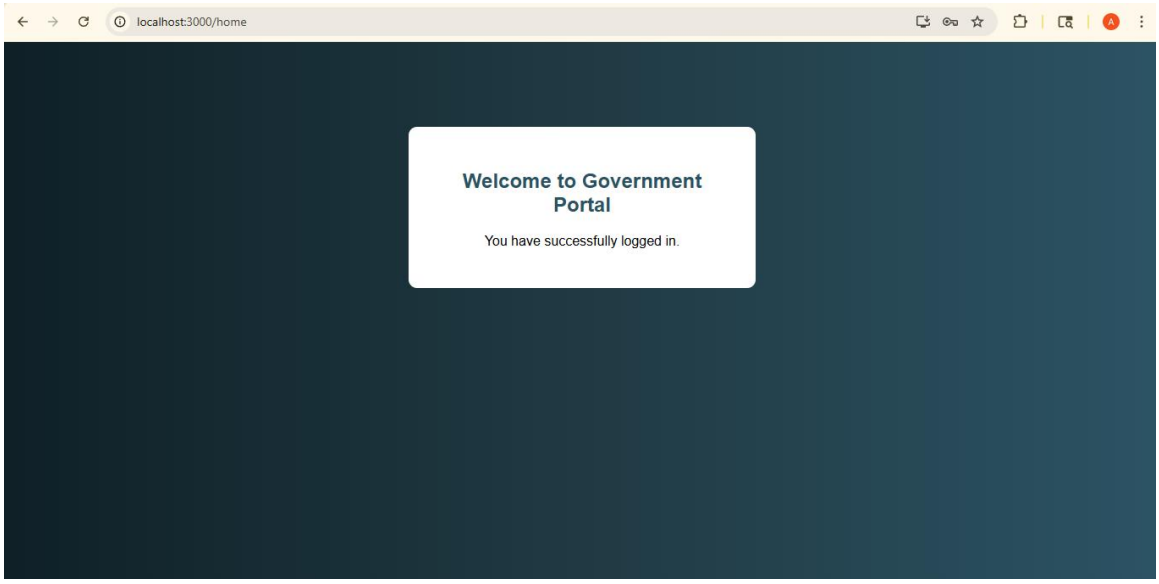
User Login
Email ID
Password
Login



localhost:3000/login
localhost:3000 says
Invalid credentials
OK
User Login
anuradhavenugopal2005@gmail.com
Login

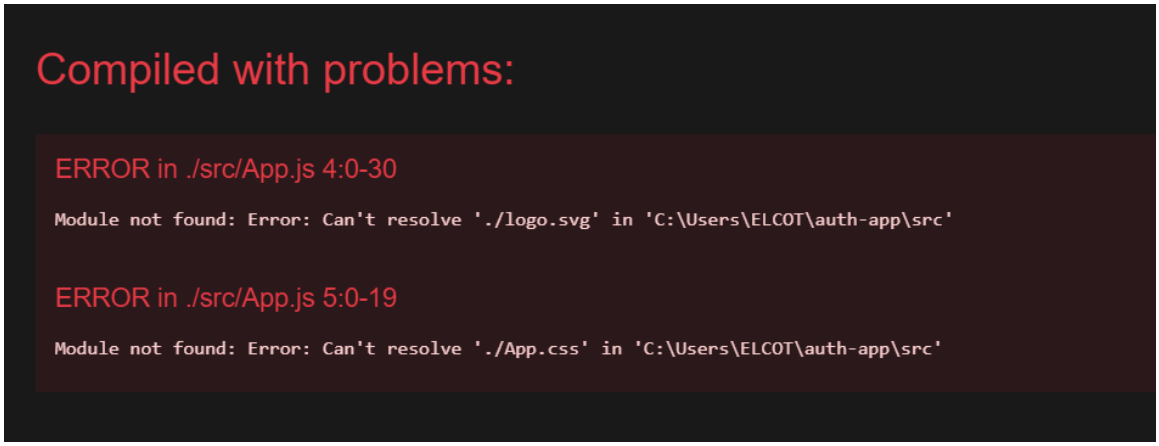


localhost:3000/login
localhost:3000 says
Login successful
OK
User Login
anuradhavenugopal2005@gmail.com
Login



localhost:3000/home
Welcome to Government Portal
You have successfully logged in.

6. Error



Compiled with problems:
ERROR in ./src/App.js 4:0-30
Module not found: Error: Can't resolve './logo.svg' in 'C:\Users\ELCOT\auth-app\src'
ERROR in ./src/App.js 5:0-19
Module not found: Error: Can't resolve './App.css' in 'C:\Users\ELCOT\auth-app\src'
